Microsoft 365 technology leader with 10 years of experience delivering enterprise collaboration services, leading technical initiatives, supporting large user populations, and improving service performance across program environments.

Education

University of California, Los Angeles

Los Angeles, CA

Linguistics

2015

Experience

Northrop Grumman Corporation

Redondo Beach, CA (Remote)

SharePoint Developer

Aug 2022 – Nov 2025

Principal SharePoint Developer

Nov 2025 – Present

- **Trained and coached** peers on SharePoint Framework development, customizations, and automations to strengthen team capability and service continuity.
- **Served as lead Front-End Developer** for an automated SharePoint provisioning solution: coordinating customer needs, low-code intake forms, and React-based site customization.
- **Led** the development of front-end utilities and scripted solutions to facilitate the migration of thousands of Enterprise-critical compliance and process-related documentation.
- **Developed and maintained** 20+ SPFx Web Parts and Extensions using Fluent UI, TypeScript, React, and SharePoint REST APIs to deliver responsive, scalable solutions for enterprise users.
- **Managed** feature backlogs and prioritized enhancements against service-performance KPIs, scalability goals, and user productivity objectives.
- **Led** post-release support and customer engagements, including issue resolution, requirements discovery, and initial solution consultations; internal B2B consulting identified more than \$250,000 in projects that were completed internally rather than outsourced.
- **Collaborated** with the Admin team, Analyst Team, and programs across all sectors to identify pain points and CSAT antagonists in SharePoint Online functionality; forming them into features for customized resources.

Northrop Grumman Corporation

El Segundo, CA (Remote)

Microsoft 365 Analyst

Aug 2016 – Aug 2022

- **Served as Product Owner** for four internal IT Services website collections, creating and maintaining 20+ SharePoint web pages to improve access to support resources and operational information.
- **Led** a six-month data-handling and training-improvement initiative that strengthened operational processes and generated approximately \$50,000 in annual cost savings.
- **Developed** 70+ training and product-adoption resources using Adobe Creative Suite and Microsoft Office, partnering cross-functionally to distribute documentation and instructional videos enterprise-wide.
- **Supported** customers in a high-volume service environment, collaborating with the team to resolve and close 20–30 tickets per week while keeping to SLA requirements and tracking service KPIs.
- **Tested** patches, executed migrations, and developed custom workflows and processes across SharePoint Online and SharePoint On-Premises environments.
